MEMORANDUM FOR: Acting Deputy Director of Central Intelligence

FROM: F.W.M. Janney  
Acting Deputy Director for Administration

SUBJECT: Status Report on CIA/DIA Collocation Study

1. In our most recent status report we indicated that DIA representatives continued to meet with their counterparts within the Agency to obtain detailed information on manning levels and dollar resources allocated to similar functions within both organizations. Their objective is to determine whether or not personnel and dollar savings would result from the proposed collocation.

2. It was hoped that DIA would complete all such meetings in November and that their final paper would be submitted to the Secretary of Defense and, subsequently, the Director of Central Intelligence in early December. However, as late as mid-December, [ ] the current DIA focal point officer for the project, was requesting that further meetings be held. According to [ ] it is his intention to submit the final DIA position paper to Admiral Murphy of DoD and the Secretary of Defense during Christmas week. However, by his own admission, senior DoD officials have not given him a firm date by which his submittal must be made, and he is working at his own pace. 25X1 25X1

3. Although we have not had access to the DIA work performed to date, [ ] advised informally that their tentative conclusion is that collocation is not supported by their analysis of the situation. We will keep you advised of any other information that comes to our attention through the DIA focal point officer. 25X1

F.W.M. Janney
